

CLEAN POWER

BIODIESEL FUEL B20

Power output shouldn't be compromised when using an environmentally-friendly fueling option. Thanks to CleanPower biodiesel fuel B20, now you don't have to.

And you won't have to give up **fuel economy** or **engine torque** either since CleanPower is nearly identical to No. 2 diesel.

Derived from 100 percent virgin soybean oil, CleanPower meets **ASTM D6751** and is one of the safest fuels available from an environmental standpoint.

The truth is, even two percent biodiesel **enhances lubricity** significantly. Lubrication is the key to movement – it's also the most prominent performance benefit associated with CleanPower biodiesel, a fuel formulated with soy and other agricultural products.

The environmentally-friendly option in diesel fueling

What is CleanPower?

Registered with the E.P.A. as both a pure fuel and as a fuel additive, soy biodiesel is designed for complete compatibility with petroleum diesel, with performance benefits including cleaner emissions and EPACT vehicle credits.

- ✘ A clean-burning, renewable fuel
- ✘ Produced from domestic, renewable resources like U.S. soybeans
- ✘ Contains no petroleum, but may be blended at any level with petroleum diesel

CleanPower offers significant clean air benefits in addition to lubricity. This particular blend is often used by government, utility company and school-bus fleets to decrease air pollution and meet clean air regulations.

CleanPower Performance Benefits:

- ✘ Increases diesel engine lubricity by up to 66 percent
- ✘ Helps extend diesel engine life
- ✘ No diesel engine modifications required
- ✘ Use year-round for all weather conditions
- ✘ Unlike some fuel additives and renewable fuels, there is no need to worry about overdosing biodiesel blended with petroleum diesel

Call the O'Rourke Specialty Fueling division today at 713.672.4500 to find out how CleanPower can benefit your fleet.

For more information on the benefits of soy biodiesel, please visit the Web site for the National Biodiesel Board at www.biodiesel.org.

Established more than 75 years ago, O'Rourke Petroleum serves as a one-stop source for industry, offering comprehensive petroleum services that include lubricants; specialty fueling services; high-speed flushing, cleaning and lubricant reconditioning service (Lubrecon Systems, Inc.); and Select Environmental Petroleum Management (SEPM), Houston's premier environmental services provider for used oil, coolant and filter collection services.

Located minutes from the Port of Houston, O'Rourke strives to offer total petroleum management for a variety of markets, including petrochemical and refining, power generation, general manufacturing, transportation, automotive and aviation.
