

As a multi-line distributor of lubricants, solvents and chemicals, we serve a variety of companies within a diverse range of industries. Through a complete line of industrial, transportation, automotive and aviation lubricants and related services, O'Rourke Petroleum provides solutions to help you lower lubrication-related costs, improve equipment reliability and reduce inventory costs.

With more than a century of combined industry experience, our Certified Lubrication Specialists™ make recommendations based on a thorough knowledge of emerging technology and a commitment to finding you the most efficient solution. Whether you need an extensive lubrication program, a drum of product or an industry expert to conduct an in-plant educational training seminar, O'Rourke Petroleum has the most cost effective solutions for your application problems.

We offer several lubrication-related solutions, including:

- ✦ Fluid reconditioning/filtration
- ✦ Computerized plant surveys
- ✦ Total lubrication program development/execution
- ✦ Lubricant recommendations
- ✦ Inventory consolidation/management
- ✦ Equipment solutions (tanks, pumps, etc.)
- ✦ Wireless tank monitoring
- ✦ Oil sampling/analysis
- ✦ Used oil collection/recycling

O'Rourke Petroleum offers a wide variety of products and value-added services for industry, including markets in petrochemical and refining, power generation and general manufacturing.

We offer a comprehensive selection of lubricants for almost every industrial application, including:

- Turbine oils
- AW hydraulic oils
- Circulating oils
- Compressor oils
- Gear oils
- Food grade oils
- Food grade greases
- Refrigeration oils
- Greases
- Heat transfer fluids
- Gas engine oils
- Transformer oils
- Process oils
- Specialty oils
- Synthetics
- Cleaners/degreasers

Lubricants – Aviation and Automotive

O'Rourke Petroleum exclusively offers Shell's line of AeroShell™ and Flight Jacket™ aviation products. We also offer a full variety of automotive lubrication products, including multi-grades as well as single grades of motor oil, antifreeze and related products.
