

Can your extensive projects be completed without efficient fuel service?

O'Rourke Petroleum Products & Solutions'

Specialty Fueling Services division provides advanced fueling solutions for several markets, including turnarounds, heavy construction projects, emergency generators, marine and special projects.

Through a flexible and responsive 24-hour fueling service, we help you stay on course with your project schedule so you can complete projects on time and within budget. Equipment programs allow you to optimize your fueling schedule and minimize interruptions to your project or operations.

With more than 70 years of combined fueling experience, O'Rourke's Specialty Fueling Services division has the knowledge and experience to make sure your projects never run out of fuel. Our staff of certified, trained drivers and an HS&E manager make it possible to have one of the most efficient response times in the industry.

Specialty Fueling Services solutions include:

- ✦ **Fueling program development and execution, including automatic scheduling**
- ✦ **Fuel additive programs designed to improve engine performance**
- ✦ **Technologically-advanced, Internet-enabled wireless tank monitoring with reporting capabilities, which can eliminate emergencies and forecast usage, requiring no up-front investments**
- ✦ **Equipment solutions (tanks, pumps, etc.)**
- ✦ **Quality, competitively-priced fuels, including ultra-low sulfur diesel and CleanPower™ biodiesel fuel B20**
- ✦ **Consolidated billing**
- ✦ **Fuel contracts**
- ✦ **Marine fueling services**
- ✦ **24/7 service**
- ✦ **Substitutes for fuel where the product is not being burned in a combustion engine i.e.; MDO, solvents, used oil, etc.**

Fuel Management Solutions

When operating a fleet of vehicles, industrial or construction equipment, fuel delivery and inventory management are critical. In fact, fuel costs often represent more than 40 percent of the total cost of a fleet or heavy equipment operation along with repairs and maintenance.

Price, supply and compliance with safety and environmental regulations are all a vital part of fuel management programs. At O'Rourke Petroleum, we've got the expertise and knowledge to design and implement a technologically-advanced fleet fueling solutions program to fit your needs.

An industry leader in the set-up and operational management of automated fueling systems, O'Rourke Petroleum can help you turn what is now a fuel cost center into an accountability center for your company. If you're looking for the utmost in controlled access, cost accountability and safety, we have solutions to account for every drop of fuel consumed by your fleet.

Part of the nationwide Commercial Fueling Network (CFN), O'Rourke Petroleum offers integrated fueling card processing solutions to fleet managers and owners, and gives your fleet access to more than 4,500 fueling locations throughout the United States and Canada and growing. All fueling sites are required to remain accessible 24 hours a day, seven days a week, and feature three grades of gasoline and two grades of diesel fuel.

O'Rourke Petroleum can also assist in the design, installation and marketing of an FFM site within a plant, manufacturing site, transportation yard or major corporate campus.

Maximizing control and security while reducing costs, FFM offers you the latest technology in automated fueling:

- ❖ **Control your fleet:** We can design and implement a computerized system, customized to meet your needs and provide fuel-type quality restrictions, including gallon and daily transaction limits and time of day/day of week fueling controls.
- ❖ **Management reports:** Comprehensive fleet and vehicle reports make fuel reconciliation paperless. Internet-enabled reports allow immediate access to transactions as they happen, with instant transaction views over the web.
- ❖ **Safeguards against theft:** Magnetic strip and PIN number technology, RFID's paired with management reports offers maximum accountability to prevent fuel theft.
- ❖ **Consolidated billing:** Receiving only one invoice to reconcile on your terms saves you valuable clerical and accounting man-hours.
- ❖ **Cost tracking:** Keep efficient tracking of costs by providing specific computerized data, including gallons per mile, odometer readings and project numbers.
- ❖ **Accurate accounting of Federal and State taxes paid**
- ❖ **Customized Fuel Management Solutions:** Including special purchase contracts and specialized fuel dispensing solutions.
